## EXPLANATORY NOTES

### SCOPE AND COVERAGE

**1** The 1996 Census of Population and Housing was held on 6 August 1996. The first Census was held in 1911 and since 1961 a census has been taken every five years, a frequency which is specified in the Census and Statistics Act 1905. The objective of the Census is to measure accurately the number and characteristics of people in Australia on Census night, and the dwellings in which they live.

**2** The Census aims to count every person who spent Census night in Australia. This includes Australian residents in Antarctica and people in the territories of Jervis Bay, Cocos (Keeling) Islands and Christmas Island. The other Australian External territories, Norfolk Island and minor islands such as Heard and McDonald Islands, are outside the scope of the Australian Census. The only group of people who spend Census night in Australia but are excluded from the Census are foreign diplomats and their families.

**3** The Census includes people on vessels in or between Australian ports, on board long-distance trains, buses or aircraft and on oil or gas rigs off the Australian coast. People entering Australia before midnight on Census night are counted while people leaving an Australian port for an overseas destination before midnight on Census night are not. Visitors to Australia are included regardless of how long they have been in the country or how long they plan to stay. However, for people who intend to be in Australia less than six months only basic demographic data are available. The Census includes people camping out and the homeless.

**4** All private dwellings, except diplomatic dwellings, are included in the Census, whether occupied or unoccupied. Caravans in caravan parks, manufactured homes in Manufactured Home Estates and self-care units in Accommodation for the Retired or Aged are counted only if occupied. Occupied non-private dwellings, such as hospitals, prisons, hotels, etc. are also included.

**5** Details about the 1996 Census content, collection operations, confidentiality and privacy protection, processing and evaluation activities are contained in 1996 Census of Population and Housing: Nature and Content of the Census (Cat.no. 2008.0).

### ABS POPULATION ESTIMATES

**6** This publication contains population counts based on where people were counted on Census night, which may not have been where they usually lived. The Census can provide person counts based on place of usual residence at the geographic level of Statistical Local Area (SLA).

**7** Official ABS population estimates (estimated resident population) are also separately available from the ABS. The estimates are based on Census counts that have been adjusted to:

- include people who were in Australia on Census night but were missed in the census;
- include Australian residents who were temporarily overseas on Census night (these people were not within scope of the census); and
- exclude overseas visitors counted in the Census who were not usual residents of Australia.

Estimated resident populations are not available below the SLA geographical level.

**8** The adjusted Census count is then updated quarterly using demographic statistics. These are statistics on births, deaths, and overseas and internal migration.

## EXPLANATORY NOTES *continued*

**9** ABS population estimates are published in Australian Demographic Statistics (Cat. no. 3101.0), produced quarterly, and in Population by Age and Sex: Australian States and Territories (Cat. no. 3201.0) produced annually.

**10** The ABS also provides projections (based on different assumptions as to future fertility, mortality and migration of the resident population of Australia, States and Territories. These projections are published approximately biennially in projections of the Populations of Australia, States and Territories (Cat. no. 3222.0).

### DATA LIMITATIONS

**11** Census data are subject to a number of inaccuracies resulting from errors by respondents or mistakes in collection or processing. Whilst many of these are corrected by careful processing procedures, some still remain. The effect of the remaining errors is generally slight, although it may be more important for small groups in the population. The main kinds of error are:

- Partial non-response: In some cases where an answer is not provided to a question an answer is imputed (often from other information on the form). In other cases a 'not stated' code is allocated.
- Processing error: While such errors can occur in any processing system, quality management is used continuously to improve the quality of processed data, and to identify and correct data of unacceptable quality.
- Random adjustment: table cells containing small values are randomly adjusted or suppressed to avoid releasing information about particular individuals, families, or households. The effects of these adjustments are statistically insignificant.
- Respondent error: Because processing procedures cannot detect or repair all errors made by people in completing the forms, some remain in final data.
- Undercount: Although the Census aims to count each person, there are some people who are missed and others are counted more than once. the data in this publication are not adjusted for the net undercount.

**12** Further information on data quality is provided progressively in Census Update and in 1996 Census Data Quality Working Papers.

### OVERSEAS VISITORS

**13** Data for overseas visitors (who intend to be in Australia for less than six months) are restricted to age, sex and marital status. In this publication, overseas visitors contribute only to the male, female and total person counts.

### CALCULATIONS OF PROPORTIONS

**14** When calculating the proportion of the population with a particular characteristic, 'Not stated' responses have been excluded from the denominator. For example, in the summary of findings, the Proportion of Australian-born was calculated by dividing the number of people who stated that they were Australian-born by the total population (excluding those who did not report their birthplace) and expressing the result as a percentage.

**EXPLANATORY NOTES** *continued*

\*\*\*\*\*

**CALCULATION OF MEDIANS**

**15** A median is a mid value which divides a population distribution into two, with half the observations falling below it and half above it. Unlike averages (means) medians are not usually skewed by extreme observations.

**16** There are a number of issues to be aware of:

- The categories 'Not stated', 'Overseas visitor', and 'Not applicable' are not included in the calculation of medians.
- If the median is calculated on a classification containing ranges and a range is open-ended and the median falls within that category, the median is set to the number in the label. For example, in the calculation of median family income, if the median falls in the last range, in this example \$2,000 or more, \$2,000 is allocated as the median.
- 'Nil income' and 'Negative income' are set to 0.

**THE SUBURBS**

**17** The suburb boundaries in this publication are unofficial and may not conform to boundaries recognised by other bodies and users. They have, however, been developed in consultation with local government authorities and with reference to the Tasmanian Towns Street Atlas published by Tasmap.

In the absence of official boundaries, the suburbs in this publication have been defined by adding together Census Collection Districts (CDs). CDs are the smallest geographic units used to collect, process and output census data. As such, any suburban boundaries produced from them are, in many cases, compromises.

The boundaries used are shown on the map on pages 16 and 17.

The Appendix on pages 33 and 34 shows which 1996 CDs comprise the suburbs of Launceston and the surrounding towns or localities.

## GLOSSARY

\*\*\*\*\*

General descriptions of terms and concepts used in this publication are provided below. Tables are also footnoted where applicable for additional clarity. Detailed definitions of classifications and concepts are available in the 1996 Census Dictionary (Cat. no. 2901.0).

**Dwelling** A dwelling is a building or structure in which people live. This can be a building, such as a house; part of a building, such as a flat; or it can be a caravan or tent, humpy or park bench. Houses under construction, derelict houses, vacant tents, or converted garages, are not counted in the Census.

There are private and non-private dwellings.

A private dwelling is normally a house, flat, part of a house, or even a room; but can also be a house attached to, or rooms above, shops or offices; an occupied caravan or unit in a caravan park or craft in a marina; occupied dwellings in a Manufactured Home Estate; occupied self-care units in Accommodation for the Retired or Aged; a houseboat; or tent if it is standing on its own block of land. An occupied caravan situated on a residential allotment is also classed as a private dwelling. Private dwellings can be either occupied or unoccupied.

Non-private dwellings are those dwellings not included above, which provide a communal or transitory type of accommodation. These dwellings include hotels, motels, guest houses, prisons, religious and charitable institutions, defence establishments, hospitals and other communal dwellings. Only occupied non-private dwellings are included in the census.

**Income** People aged 15 years or more are asked to state their usual gross weekly income, which is the income before tax, superannuation, health insurance, or other deductions are made. Gross income includes family allowance, family allowance supplement, pensions, unemployment benefits, student allowances, maintenance (child support), superannuation, wages, salary, overtime, dividends, rents received, interest received, business or farm income (less operation expenses) and worker's compensation received.

**Indigenous** A person is defined to be of Indigenous origin if he or she identifies himself or herself as of Aboriginal and/or Torres Strait Islander origin.
